

9th WORLD WATER
FORUM | DAKAR 2022

Source-to-sea management of freshwater and oceans

Monday, 21 March 2022 | 16:30 – 17:15 (Dakar time)

UNESCO Pavillion

Connect online: <https://bit.ly/unesco-9th-wwf>

Improving water management and governance across the source-to-sea continuum of inland freshwater, coastal and marine ecosystems is vital for sustainable water management and healthy ocean.

The event provides a platform for discussion on ways the source-to-sea approach to water management and governance can be applied. Concrete cases and examples of the source-to-sea management of water pollution and sediment will be presented. The governance aspect of the source-to-sea approach will be discussed. A major publication "Source-to-sea Management", produced by IWRA in collaboration with UNESCO, SIWI and other partners, will be presented at the event.

Co-organizers/Co-moderators

UNESCO Intergovernmental Hydrological Programme – Sarantuyaa Zandaryaa
